V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement.

1. Statement

Novelty (N)	Claims	1 - 6	YES
	Claims		NO
Inventive step (IS)	Claims	1 - 6	YES
	Claims		NO
Industrial applicability (IA)	Claims	1 - 6	YES
	Claims		NO

2. Citations and explanations

- Document US-A-4577646 discloses all the features of the preamble of claim 1: a tobacco puffing process by treatment of the tobacco material with a treatment gas consisting of nitrogen and/or argon at pressures from 400 to 1000 bar, followed by continuous decompression and the thermal post-treatment of the discharged tobacco material.

In order to puff tobacco in autoclaves, the characterising part of claim 1 provides for the filling density of the tobacco load in the autoclave to amount to more than 0.2 kg/dm³. This increase in the filling quantity leads to a reduction in the specific consumption of treatment gas for a tobacco quantity to be puffed.

None of the processes known from the prior art includes this process step.

- Claims 2-6 are dependent on claim 1 and therefore likewise meet the PCT novelty and inventive step requirements.
